April 29, 2020

### **Town of Zionsville employee tests positive for COVID-19**

This afternoon the Town of Zionsville received notification that a Town employee has tested positive for COVID-19. The employee left work on the afternoon of Monday, April 27 after displaying symptoms of COVID-19. The employee was tested that day and has been under self-quarantine at home under the care of a physician. We are keeping this employee in our thoughts and join their friends in wishing this person a speedy recovery.

The Town of Zionsville has informed all employees in the department with whom this employee may have come in contact and is providing testing to employees who may have worked in the same facility. This employee did not interact with members of the public in a professional capacity.

Since March 20, the Town has instituted enhanced cleaning, sanitizing and disinfecting procedures through our contract cleaning service provider at all Town facilities. As part of the Town's COVID-19 policy, all Town employees working in Town facilities are required to wear a mask while at work. Town operations will continue as scheduled.
