

Raptors are fascinating birds, but they can cause some confusing identification situations. Join Sabrewing Nature Tours owner Rob Ripma as he shares his top tips and tricks for identifying these incredible creatures. We'll work on identifying raptor species both while perched and in flight and then practice a few days later in the field. He will cover all of our commonly occurring raptors (eagles, hawks, and falcons) as well as some less common species that on rare occasion find their way to Indiana. Join us to learn all about these powerful birds! Registration is required at www.zionnaturecenter.org

Wednesday, April 10

Raptor ID Workshop

Zion Nature Center

7 p.m.

Fee: \$20

Field Session: Saturday, April 13 @ 7:30 a.m.
